In Method (2) of applying reflectorized traffic paint, where the glass beads are applied to the surface of the freshly applied pigmented binder, the application rate for the said beads shall not be less than 5 pounds or more than 6 pounds of glass beads per gallon of paint, unless otherwise specified. The paint shall have a minimum wet thickness of 15 mils.

When using glass beads suspended in the pigmented binder and applied in one operation, the use of an approved mechanical agitator in the application may be required by the Engineer.

The Engineer reserves the right to withdraw the approval of the spraying or brushing equipment if a satisfactory finish is not obtained.
